```kotlin
fun main() {
    val orders = listOf(...)

    orders.forEach {
        val groundBeans = grindCoffeeBeans(it.beans)
        val espresso = pullEspressoShot(groundBeans)
    }
}
```

```kotlin
fun main() {
    val orders = listOf(...)

    orders.forEach {
        val groundBeans = grindCoffeeBeans(it.beans)
        val espresso = pullEspressoShot(groundBeans)
        val steamedMilk = steamMilk(it.milk)
    }
}
```
